Project 00.1075, "Qualitative Evaluation of Special Material as a Source"

- 1. A list of all Fiscal Year 1955 research by units of the I dustrial Division is attached. It is possible, because of the number of projects involved, that one or two projects (perticularly CSMs) were omitted.
- 2. The list includes, in addition, a few projects which were completed but not published for one or more reasons. These were included because it was felt that they would still be of some assistance in the second phase of this project namely, the use of certain sources in the research process.
- 3. Certain projects on this list may be delayed or cancelled before the end of the research year.
